

8 Inch Plasma Ball

REDIGLE® is a professional leader China 8 inch plasma ball manufacturers. It covers about 28000 square meters. Tianhua Brand is specialized in the LED lighting item, such as LED pendant lamp, LED table lamp, LED floor lamp, LED tube, LED panel light, LED bulb, fiber optic lights, plasma lamp, Christmas tree, lava lamp, energy-saving lamp and so

onThe lamp body is made of plastic. its excellent quality can pass CETL, FCC, GS, CE, ERP, Rohs certificates etc.

REDIGLE® is a professional China 8 inch plasma ball manufacturers and suppliers, if you are looking for the best 8 inch plasma ball with low price, consult us now!

Drive free, suit for any operation system.

Plug and play

With on/off switch on the base.

Powered directly by a USB port

Touch the ball, the light will gather to kiss your fingertips.

Dongguan City Tianhua decor 8 inch plasma ball Specification

Product	Plasama ball
MATERIALS	Metal , Glass , glitter
PRODUCT SIZE	15.5 x 15.5 x H:24cm
DATA	
Power	Operation by DC12V 500mA or 750mA adapter
Function	Red plasma light,ON, OFF & sound-responsive
Color	Black base
Packing	1pc/color box,
Color box	
Carton box

**Touch the ball wall light will be readily finger
more dynamic changes flashing**

An alternating current, at relatively high voltages (Hey, this is USB remember, so it can't get too crazy), are pumped into the sphere via an electrode in the center. This energy causes electrons to be stripped from the gasses, leaving in its wake some positively charged ions and a gorgeous gaseous and electrically conductive environment (aka Plasma). That high voltage served up through the electrode will now arc up through the plasma to the lower voltage edge of the plastic sphere (starting at the top where the temperature is greater). The arcs glow because they are hotter than the surrounding plasma. You can touch the plastic and the arcs will strongly congregate to your touch because you will be creating an even lower voltage jump from the electrode. All this made possible by the evil genius of Nikola Tesla, oh, and some science.

Powered by an included USB cable, this 8 inch plasma ball is about stands about 6 inches high and includes an on/off switch. While it emits a very low current, it does so at a relatively high-voltage and so it does produce some EMF. Respect your plasma ball and it will respect you
